

Hello and welcome to the first MSRC newsletter. With these, we hope to keep you up to date with our work plus other things within Leeds Medical School and further afield.

Recent news

MSRC have secured a cash machine in the APL. This should be installed and ready to use by 5th October.

We have also fought for water fountains within the medical school which you should notice appearing soon!

News on medics' i phones has now made it national. Check out the BBC article <http://www.bbc.co.uk/news/education-11427317>

Curriculum 2010

You should know all know a little about curriculum 2010 or at least what it means to you. However, although the content is changing we thought we would keep you up to date with the lingo

PPD = IDEALS

SSCs = RESS

Patient Evaluation =
Campus to clinic

Transport = Core body
systems

MUMS Party

Over 500 people attended the MUMS party at Gatecrasher. £1,700 was made, which will go back to sports and societies

Want to advertise your event in our next newsletter? Email us at msrc.leeds@gmail.com

Admissions News

Leeds Medical School now requires 3 grade As at A level for entry

MSRC website

The address for the MSRC website is below. There are actually loads of useful things on here such as

MCQs for most lectures

Shuttle bus timetable

MSRC rep contact information

Information for various medic societies

Societies

If you're interested in GI medicine keep your eyes open for "Insides Out", a society being set up to explore internal medicine. They're looking to hold lectures organise shadowing. If you want to be involved contact Joe Ledsam insidesoutleeds@gmail.com

If you' run a society or are thinking about setting one up and want help with publicity, getting started or financial help from MSRC, email Societies' Rep Clare at um07cep@leeds.ac.uk.

Featured Society

Cardiology Society

This new society started last year and aims to cater for all students from all years with an interest in clinical or academic cardiology. They host regular talks from heart experts about the latest developments in their field and the practicalities of working in this specialty.

They also run clinical skills teaching sessions, designed to supplement and extend upon the clinical teaching in the MBChB curriculum. Look out for hospital sessions including ECG interpretation.

There is also a mentoring scheme in the pipeline which will pair student groups with a cardiology trainee in the hospital to discuss career options, spend time in the cath labs and learn more about life in this specialty.

Check out the facebook group

'Leeds University Cardiology Society'.
